Day 2	Kungwe Beach Lodge Mahale National Park	<p>Breakfast at Kungwe Beach Lodge. Morning chimpanzee viewing in Mahale National Park. The chimps of Mahale have been observed by researchers from Kyoto University since 1960. They are among the most habituated chimps in the world. You are in for great adventures. Trackers from TANAPA and Kungwe Camp have been in the forest all day. Your Kungwe guide will let you know when it is time to set off into the forest. You'll track into the forest between ½ hour and 2 hours, depending on where the chimps are located. Maximum viewing time allowed with the chimps is between 1 to 2 hours depending on the number of visitors in the park. Lunch back at camp with an afternoon of relaxing, hiking, or beach activities.</p> <p>Some guidelines to follow while you are viewing chimpanzees:</p> <ul style="list-style-type: none"> • No more than six tourists are allowed to view the chimpanzees at any one time. • You should maintain a distance of at least 5 meters from the chimpanzees. Do not touch the chimpanzees or try to make contact. The chimps will break the rules occasionally. In such cases, don't increase the distance between you and them, but drop back as soon as you can without disturbing them. • Do not use flash cameras. • Do not eat or smoke.

- Do not do anything that may cause the chimpanzees stress or exhibit any behavior that they may see as a challenge. Respect their space, speak very quietly, and avoid unnecessary movement.
- Keep in a small group and never surround the chimpanzees.
- Respect any scientific teams that may be observing the chimpanzees by not obstructing their view and giving them room to carry on their research.
- Leave nothing behind but footprints.
